

Hi-Tac Watercooled 500cc Twin

Based on the Suzuki T500 bottom end, the UK built Hi -Tac water-cooled 500cc twin was an interesting attempt to build a sports road going 500 and a successful road racing engine.

Thanks to Bas Völlink for the pics.....seen at the Bikersclassics in Francorchamps this year (2005) a beautiful job and I would love a set of those pipes!
